

Taking notes is important for staying organized and remembering important information in school or work. But for people with disabilities, taking notes can be difficult. Physical disabilities can make it hard to hold a pen, while learning disabilities can make it challenging to read, write and pay attention. Luckily, there are apps, features and websites available that can help people with disabilities take notes and capture information more easily.

**AudioNote** allows the user to link audio to their handwritten or typed notes. This allows the user to jump back in time to when the note was taken to relisten to what was said at that exact moment. Never miss important information again. You can also import pictures and videos and enter them directly into your notes.

**Compatibility:** iOS, iPadOS, Mac, Android, Windows

**Cost:** \$9.99 for iOS, iPadOS and Mac; \$14.99 for Windows

**Otterai** is an easy-to-use app that converts spoken words into written text notes. It has useful functions such as labeling and effective search tools that help you arrange your notes in a well-organized manner by searching for specific words or phrases.

**Compatibility:** iOS, Android, Web app

**Cost:** Price ranges from Free to \$9.99 per month

**ClaroPDF** is a versatile app that simplifies note-taking in classes or meetings. You can upload the documents to the app and annotate them using various tools such as highlighters, handwritten notes, videos and audios.

**Compatibility:** Windows, Mac, iOS, Android

**Cost:** \$9.99

**BigNote** has a simple interface that makes it easy for users to take notes, add sketches and record images. This app is a low-cost option for those who need to quickly jot down notes while on the go.

**Compatibility:** iOS, iPadOS

**Cost:** \$1.99

**OneNote** is an app that lets you capture notes in different formats such as text, images and audio. It offers helpful organizational tools like notebooks, sections and tags to manage and locate notes quickly. Additionally, a powerful search engine helps you find information, even if you are unsure about what you're looking for.

**Compatibility:** iOS, iPadOS, Android, Mac, Windows

**Cost:** Free

**Good Notes** is an app that lets you create, annotate and organize notes in various formats, including text, images and handwriting. It's compatible with a stylus, which is useful for those who prefer handwriting over typing. It also includes handwriting recognition, which makes your notes searchable.

**Compatibility:** iOS and iPadOS

**Cost:** \$7.99

**Evernote** is an app that lets you create, organize and share notes on different devices. You can make notes using text, images, audio or video. The app includes tools to help you organize your notes like notebooks, tags and reminders.

**Compatibility:** iOS, Android, Mac, Windows

**Cost:** Price ranges from Free to \$69.99 per year

**Glean** is a note-taking app you can use on the web. It has an easy-to-use interface and lets you collaborate and organize notes and ideas. With Glean, you can add multimedia files like images and videos to your notes. The app also has features like tagging and searching to help you stay organized and find your notes quickly.

**Compatibility:** iOS, Android, Mac, Windows

**Cost:** \$129 per year

**Google Keep** is a note-taking app and much more. Create notes using text, images and voice memos, and easily sync them across all your devices. The app offers several organizational tools, including labels, color-coding and categories, to help users stay organized. Additionally, you can set reminders for specific notes that will be synced across devices, making it easy to remember important tasks.

**Compatibility:** iOS, Android, Web App

**Cost:** Free
